

# PABLO

## The Internet

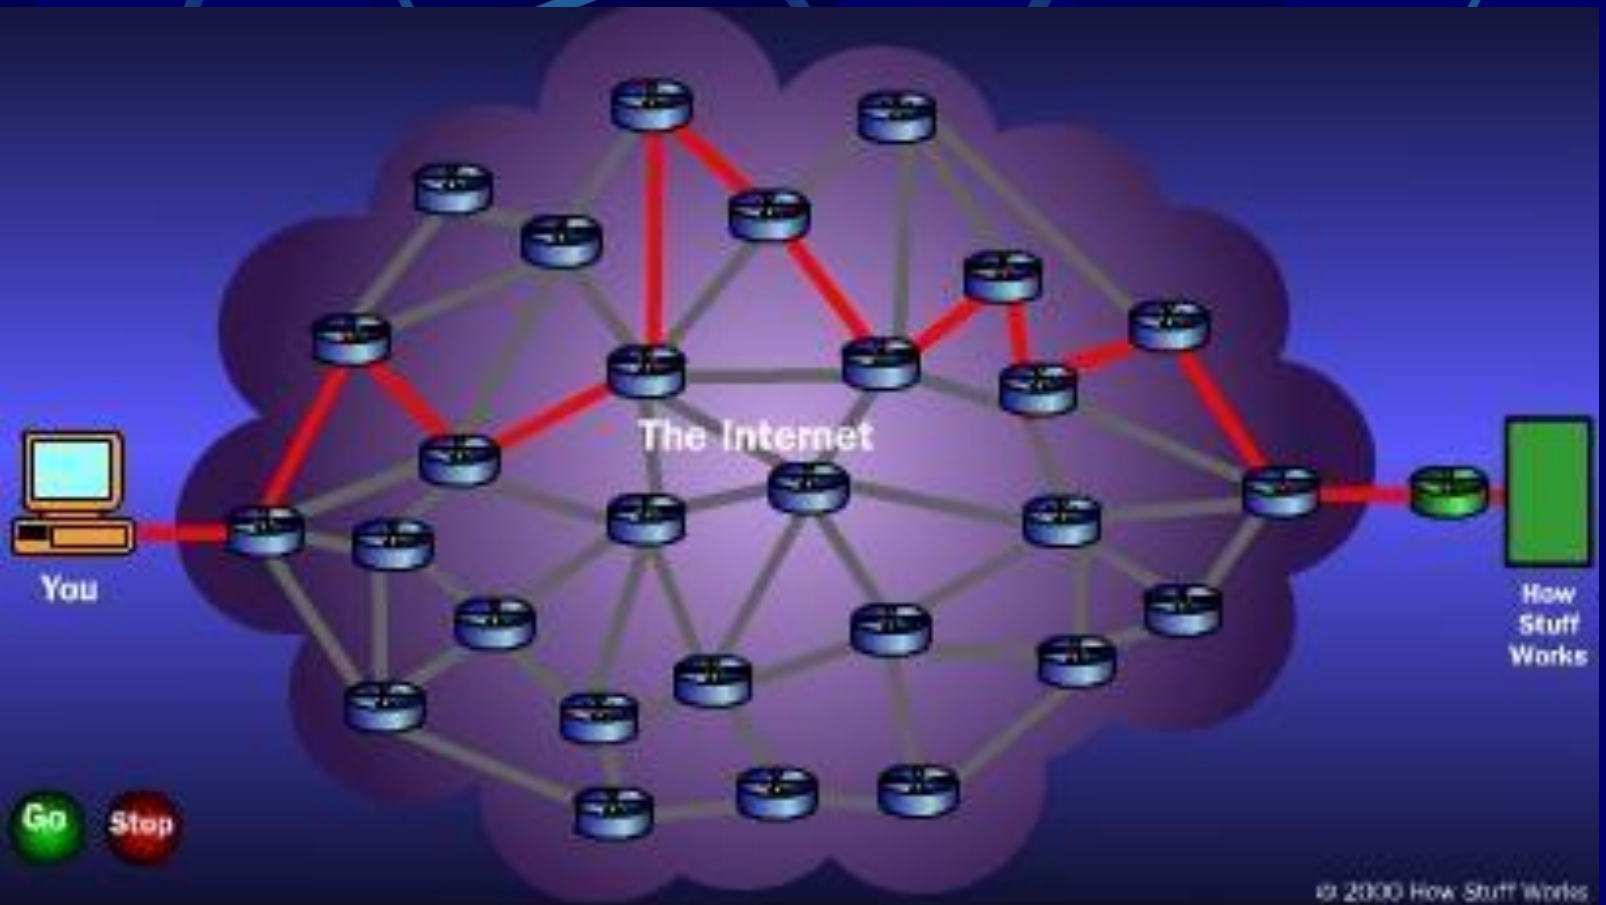

# What is the Internet?

- The Internet is a global web of computers connected to each other by wires, (mostly phone lines). If you look at a map of big cities, smaller towns, and scattered houses, each is connected together with roads, railways, etc.. This is similar to the Internet, except with the Internet,

The background is a solid dark blue. Overlaid on this are several thin, light blue lines that intersect at various points, creating a web-like or star-like pattern. The lines are of varying lengths and orientations, some extending from the edges towards the center, others crossing each other in the middle.

wires connect computers. The  
Internet is a superhighway.

**Routers determine the path between you and an Internet server**

# Some ways to use the Internet

- E-mail
- Research ●
- Shopping
- News
- Games

- Ed-line

**Do you ever use the Internet?**

**How often do you use the Internet?**

**Why do you generally use the Internet?**

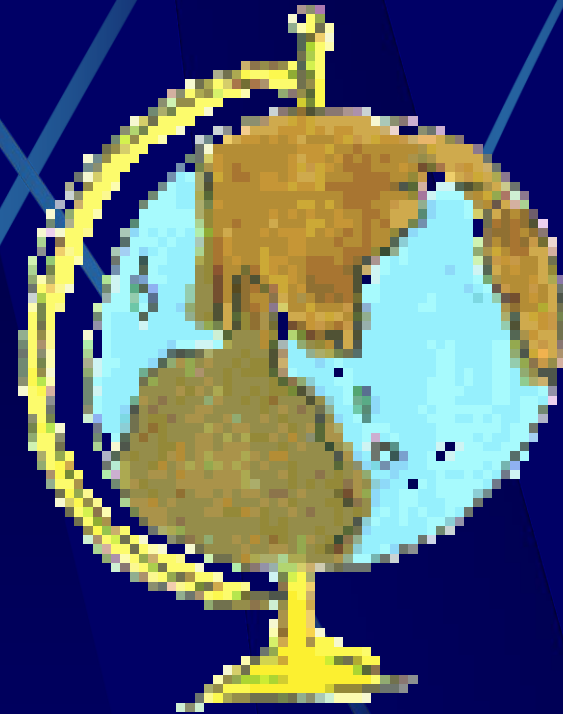

# Internet Terms

- WWW
- Browser
- Search Engine
- URL ●
- Domain ●
- html

**WWW**

- The World Wide Web

# Browser

- Software program that allows a person to view WWW documents. Examples of browsers are Netscape, Microsoft Internet Explorer, Mosaic, Mac web, and Net cruiser.

**Let's Look at some  
examples of some  
browsers.**

## **Search Engine**

- A web site that will help you search the Internet for key words, subjects, etc.

**Let's try a search now!**  
**URL**

- UNIFORM RESOURCE LOCATOR-

The unique address of any web page.  
It tells your computer where the  
information is stored so it can be  
viewed.

**Now we are going to look  
at a URL**

# Domain

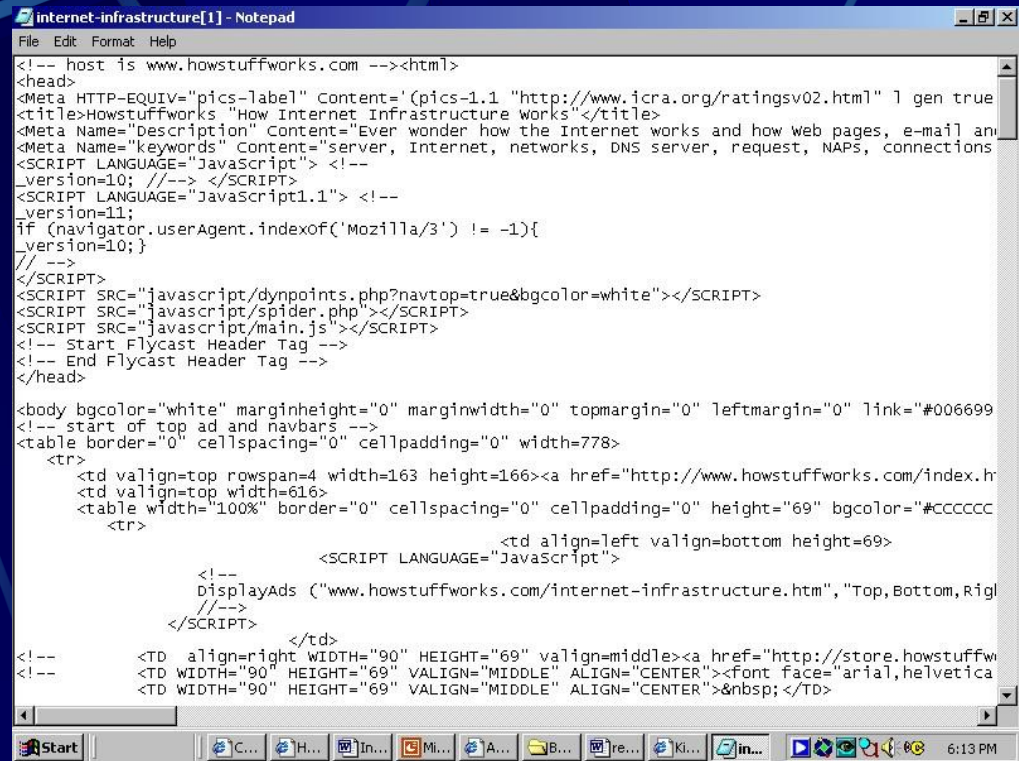

- A way to indicate what type of site you may be viewing. In the U.S. some common domains are .com-commercial, .org-nonprofit and research organizations, .govgovernment agency, .edu-education. More are constantly being added so theses should only be used as guidelines to help you know what type of site you are on.

**What is the Domain for the  
School Districts web site?  
html**

- The Language used to create Web Pages
